

INSULATING BLIND COVERS PANO

Protects against the cold and bad weather in winter, as well as against UV rays in summer. Installation on the outside prevents frost and condensation from forming. This insulating blind covers the windscreen and front windows in one piece. There is no need to remove it completely to make the most of daylight: its partial opening system on the windscreen makes it possible to take advantage of the sunlight indoors, while leaving the blind in place. Easy and clever system for mounting, thanks to the custom design for each type of vehicle and its unique installation system with ultra-powerful magnets and hooks. It is a perfect fit for the shape of your vehicle for optimal hold and insulation, without damaging the bodywork.

- Top-of-the-range thermal insulation, made from 7mm multilayer insulating material
- Includes a 600D canvas storage bag and installation kit.
- Custom fitting provided for each vehicle.
- Easy to install thanks to magnets and holder hooks.
- Protect your privacy while keeping your vehicle bright.

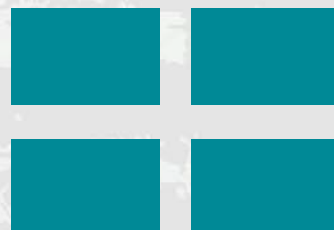

Velcro adjustment: the shutter is perfectly flush with the bodywork

3 fixing hooks for optimal shutter tension

Magnet fastening for optimal shutter tension without any risk to the bodywork
