That's what
the rooflight
needs to do!

There is nothing we can do better.

VisionStar M

VisionStar L

**Not a gimmick in sight - just ease of use
and quality you can trust.**

Just a rooflight that delivers what we promise: Installation, use, durability - hassle free, easy, reliable. For caravans, motorhomes and everything that travels.

If there's one rooflight in our range that we think is perfect,
it's the one from our

VisionStar series

What can it do?

With its sleek design and elegant appearance, it sets new standards in both design and functionality. The simple one-handed operation with the handle bar allows you effortless handling without complicated mechanisms.

Thanks to the steplessly adjustable positioning, you can customize the rooflight exactly to your preferences, whether for light ventilation or fully opening them for maximum fresh air supply.

The rooflights impress not only with their aesthetic design but also with their durability. They are ultra-robustly constructed to withstand various weather conditions.

Additionally, the tinted dome material offers high UV protection, keeping you safe from harmful sun exposure while still allowing you to enjoy natural daylight.

Experience comfort, functionality, and durability with the new rooflight that leaves nothing to be desired.

VisionStar L 700 x 500 mm

The large panoramic rooflight VisionStar L not only provides plenty of light and air in your motorhome or caravan but also offers a unique view. The MPK rooflights from our VisionStar series feature a low-profile design, are easy to operate, steplessly adjustable, particularly noise-reducing, and ultra-durable. The VisionStar L rooflight, measuring 70x50 cm for a 700 x 500 mm cutout, is also available with dimmable, energy-saving LEDs in the inner frame upon request.

Features:

- Tinted polycarbonate rooflight with double glazing
- Steplessly adjustable up to 55°
- Flat dome (only 105 mm above roof level)
- High UV protection due to tinted dome material
- Robust domes made of impact-resistant polycarbonate
- Easy one-handed operation with handle bar
- Modern inner frame with pleated blind and net
- Available with or without permanent ventilation

Technical Specifications:

Cut-out dimensions: 700 x 500 mm
 Roof thickness: 25 mm - 60 mm
 Dome size: 815 x 583 mm
 Corner radius: 23 mm
 Permanent ventilation: up to 150 cm²
 Height above roof : 105 mm
 Frame dimensions: 872 x 610 x 37 mm

VisionVent S pro 280 x 280 mm

With the VisionVent series rooflight from MPK, condensation water in caravans and motorhomes is a thing of the past. Thanks to a clever design featuring covered ventilation, air cushions to prevent drips, and channels for drainage, condensation is minimized even in adverse weather conditions and with intensive use of the vehicle's interior. The aerodynamic design enhances travel comfort by reducing road noise and minimizing drafts.

Features:

- Tinted glass rooflight with telescopic props
- Four-way adjustable
- High UV protection due to tinted dome material
- Permanent ventilation between domes to reduce condensation
- Modern inner frame with double pleated blind

Technical Specifications:

Cut-out dimensions: 280 x 280 mm

Inner frame with plisse

The MPK rooflights with matching inner frames offer you even more comfort when camping. Fly nets let in light and air and keep mosquitoes and spiders out. A pleated blackout blind ensures undisturbed sleep without impairing the exchange of air. With illuminated inner frames on your rooflight, you have a practical central light source: energy-saving dimmable LEDs provide warm lighting in the desired brightness.
